SUBJ: Connecticut Ambient Impact Analysis Guideline

FROM: Stephen S. Perkins, Chief *Steph S Perkins*
Technical and Program Support Branch

TO: Joseph A. Tikvart, Chief
Source Receptor Analysis Branch

At long last we have received a formally submitted Ambient Impact Analysis Guideline from Connecticut. Surprisingly and happily it looks far more like EPA's Guideline than the preceding drafts the Regional Office and the Model Clearinghouse have commented on over the past five years. This reflects David Wackter's good influence and growing control over Connecticut's modeling program.

In an effort to avoid surprises when the CT Guideline enters the SIP revision door to the Clearinghouse, we would appreciate the Clearinghouse's earlier review of the document (enclosed). It would be of great help if we could have comments from your staff by March 31, 1989.

Rich Burkhart is reviewing the document here. If your staff have any questions, please have them call Rich at FTS 835-3229.
