MEMORANDUM

SUBJECT: Hadson Power (VA) Prevention of Significant
Deterioration Permit Modeling

FROM: *Dean A. Wilson*
Dean A. Wilson, Meteorologist
Source Receptor Analysis Branch (MD-14)

TO: Regional Modeling Contact
Regions I-X

As you know, the Model Clearinghouse has a policy whereby an advance concurrence is sought from all the Regional Offices on responses that may have national implications. Pursuant to that policy attached is a proposed response to Region III dealing with the modeling of increment consumption in a Class I area attributable to several sources located at different distances (including some beyond 50 kilometers) and different azimuths from the receptor area.

Note that we are agreeing with Region III, to allow the use of meteorological data that are judged to be representative of the receptor area, rather than the source, as has always been our practice. It is primarily because of this aspect of the proposal that we are seeking your concurrence.

Consistent with past practice regarding concurrences of this type and commensurate with Region III's need for a timely response, please complete your review within 5 working days. Please provide your comments to me by July 31 (FTS Telephone: 629-5683; fax: 629-2357).
