

Transitions – EPA HQ and Regional Offices

- Over the past 2 years, we have had several key retirements in EPA Headquarters (OAQPS) and our Regional Offices
- EPA was established in 1970... so we've just celebrated our Golden Anniversary
 - A very small handful of “lifers” that were around before EPA's Big Bang have just retired
 - Significant loss of institutional knowledge by those that not only were around... but devised the policy and regulations that we are following today
- 2020 was also 30 years post the 1990 Clean Air Act Amendments
 - EPA went through a significant staffing expansion related to the 1990 CAA Amendments
 - 30 years of service, political unrest throughout all federal government agencies, and a global pandemic have resulted in many deciding that there are other adventures that they would like to explore in life.
