

## Permit Information

Report Year: 2018NPDES ID: IDR053048

## Facility Information

Facility Name: MERIDIAN TRANSFER STATION

## Facility Point of Contact

First Name Middle Initial Last Name: Jake Paetsch

Organization:

Title:

Phone: 406-532-7885 Ext.Email: jpaetsch@republicservices.com

## Facility Mailing Address

Address Line 1: 2130 WEST FRANKLIN ROADAddress Line 2: City: MERIDIANZIP/Postal Code: 83642 State: IDCounty or Similar Division: ADA

## General Findings

Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use pavement deicers containing urea (e.g., "Urea was not used at [name of airport] for pavement deicing in the past year and will also not be used in 2015." (Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.)

Routine facility inspections were conducted on the following dates: 3/20/18, 6/26/18, 9/27/18 and 11/30/18. During each inspection there was no discharge occurring at the site. The site has a stormwater pond where all runoff is contained, and prevents discharge from the facility. No incidents of noncompliance observed and all of the conditions within the permit were met. Inspection areas included but not limited to material storage areas, areas identified in the SWPPP and those that are potential pollutant sources, areas where industrial materials or activities are exposed to stormwater, and discharge points.

Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit).

Quarterly visual assessments were conducted on the following dates: 3/20/18, 6/26/18, 9/27/18 and 11/30/18. During each inspection there was no discharge occurring at the site. The site has a stormwater pond where all runoff is contained, and prevents discharge from the facility.

For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation, and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable.

NA. No discharge occurred at the site during the 2018 calendar year.

Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: If corrective action is not yet completed at the time of submission of this annual report, you must describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance in the past year or currently ongoing, or if none, provide a statement that you are in compliance with the permit.

Site is in compliance with the permit. No corrective action is necessary and no incidents of noncompliance observed.

#### Certification Information

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
