

Permit Information

Report Year: 2018NPDES ID: IDR053232

Facility Information

Facility Name: DMP 306

Facility Point of Contact

First Name Middle Initial Last Name: Jennifer Godwin

Organization:

Title:

Phone: 208-245-2096 Ext.Email: jgodwin@optaminerals.com

Facility Mailing Address

Address Line 1: CARPENTER CREEK RD, MILE MARKER 1Address Line 2: City: FERNWOODZIP/Postal Code: 83830 State: IDCounty or Similar Division: BENEWAH

General Findings

Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use pavement deicers containing urea (e.g., "Urea was not used at [name of airport] for pavement deicing in the past year and will also not be used in 2015." (Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.)

This site was reclaimed in 2017 and was partially vegetated prior to spring of 2018. Straw was spread over the entire floodplain to reduce sediment transport during run-off events. Storm water run-off was reported to be clear during January and February. As of May the site was growing grass and shrubs well and the remainder of the year was reported to have vegetation established. No further activities will occur on this site.

Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit).

During quarters 1 and 2, the discharge was reported to be clear to very light yellow.

For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation, and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable.

Samples of run-off were collected during quarters 1 and 2 and were tested for pH, TSS, and Nitrate/Nitrite. During Q2 the pH was 6.8, TSS totaled 20 mg/L, and Nitrate/Nitrite was not detected. During Q1, the pH was 7.9, TSS 38 mg/L, and Nitrate/Nitrite 0.46. Both were below benchmark parameters. As of June 2018, the site was fully vegetated and no further sampling or activities to occur. Straw had been previously spread over the entire site and control measures were operating effectively.

Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: If corrective action is not yet completed at the time of submission of this annual report, you must describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance in the past year or currently ongoing, or if none, provide a statement that you are in compliance with the permit.

No corrective actions were conducted on this site. The site was fully vegetated by the end of the year.

Certification Information

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
