

## Permit Information

Report Year: 2018NPDES ID: IDR053126

## Facility Information

Facility Name: STIMSON LUMBER COMPANY, PRIEST RIVER FACILITY

## Facility Point of Contact

First Name Middle Initial Last Name: David Balfanz

Organization:

Title:

Phone: 208-448-1141 Ext.Email: dbalfanz@stimsonlumber.com

## Facility Mailing Address

Address Line 1: 12 OLD PRIEST RIVER ROADAddress Line 2: City: PRIEST RIVERZIP/Postal Code: 83856 State: IDCounty or Similar Division: BONNER

## General Findings

Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use pavement deicers containing urea (e.g., "Urea was not used at [name of airport] for pavement deicing in the past year and will also not be used in 2015." (Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.)

Nothing of significance was noted in the RFIs.

Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit).

Darkish water with some odor noted from Outfall 001 that drains the east side of the property. Some cloudiness in Outfall 002 on occasion. No larger material or foam noted.

For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation, and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable.

NA

Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: If corrective action is not yet completed at the time of submission of this annual report, you must describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance in the past year or currently ongoing, or if none, provide a statement that you are in compliance with the permit.

The site is in the midst of a two-year corrective action schedule as provided to EPA earlier. Investigations around zinc have identified additional sources including hydraulic oils - we are evaluating the feasibility of replacing these oils. Also evaluating coating or replacing additional galvanized roofing. Sediment and BOD are currently being evaluated for the possibility of using chitosan as a flocculant. Freezing conditions and lack of rain have hampered 2018-19 efforts a bit but expect to be implementing recommendations in accordance with the schedule previously submitted to EPA. The facility is in compliance with the permit.

#### Certification Information

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
