

Permit Information

Report Year: 2019NPDES ID: IDR053096

Facility Information

Facility Name: PACIFIC STEEL AND RECYCLING

Facility Point of Contact

First Name Mike Middle Initial Kempel Last Name: KempelPhone: 208-375-2131

Ext.:

Email: mike_kempel@pacific-steel.com

Facility Mailing Address

Address Line 1: 5120 EMERALD STREET

Address Line 2:

City: BOISEZIP/Postal Code: 83706State: IDCounty or Similar Division: ADA

General Findings

Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use pavement deicers containing urea (e.g., "Urea was not used at [name of airport] for pavement deicing in the past year and will also not be used in 2015." (Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.)

Routine Facility Inspections took place on April 5, 2019, July 1, 2019, September 6, 2019, and December 27, 2019. A discharge/sample took place on September 6, 2019.

Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit).

Sample Location: Outfall #1
Collection Date and Time: 09/06/19; 11:40am
Person Collecting Sample: Audy Bates
Nature of Discharge: Rainfall
Results of Observation: Cloudy Brown, No Odor, Settled and Floating Solids, Slight Sheen, No Foam.

For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation, and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable.

N/A

Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: If corrective action is not yet completed at the time of submission of this annual report, you must describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance in the past year or currently ongoing, or if none, provide a statement that you are in compliance with the permit.

The September 6, 2019 sample had eight parameters over Benchmark. E-Coli was not tested due to a new staff person did not know it was needed. Corrective-action included staff training on sheet flow sampling procedures, better housekeeping, and better use of oil/water separators. This facility seldom discharges. What discharge that occurs is minimal.

The facility is in-compliance with its Permit.

Certification Information

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I have no personal knowledge that the information submitted is other than true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
