

## Permit Information

Report Year: 2019

NPDES ID: IDR053232

## Facility Information

Facility Name: DMP 306

## Facility Point of Contact

First Name Middle Initial Last Name: Jennifer GodwinPhone: 208-245-2096 Ext.: Email: jgodwin@optaminerals.com

## Facility Mailing Address

Address Line 1: CARPENTER CREEK RD, MILE MARKER 1Address Line 2: City: FERNWOODZIP/Postal Code: 83830State: IDCounty or Similar Division: BENEWAH

## General Findings

Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use pavement deicers containing urea (e.g., "Urea was not used at [name of airport] for pavement deicing in the past year and will also not be used in 2015." (Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.)

All control measures operated effectively throughout the year. This site was in-active January through June and during February of 2019 it was inaccessible due to deep snow. The majority of the site is fully reclaimed and fully vegetated. Site-prep and mining activities began in July on the upper end of the site. A vegetated berm was installed along the perimeter of the site and fencing was installed to restrict cows. Mining was in-progress during July through September. In October an interceptor channel was installed on the upper end of the site to direct overland flow away from the exposed areas. During November and December the site was in-active.

Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit).

No discharge was reported during this year's quarterly visual assessments.

For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation, and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable.

NA

Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: If corrective action is not yet completed at the time of submission of this annual report, you must describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance in the past year or currently ongoing, or if none, provide a statement that you are in compliance with the permit.

No corrective actions were reported and there are no outstanding corrective actions. This site is in compliance with the permit.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I have no personal knowledge that the information submitted is other than true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
