Re: Additional Monitoring Requirements for Idaho Materials and Construction Moyle Facility under the National Pollutant Discharge Elimination System Multi-Sector General Permit, Permit Reference No. IDR05J009

Dear Mr. Clark:

The purpose of this letter is to notify you of two additional monitoring requirements that must be implemented at your facility to maintain permit coverage under the U.S. Environmental Protection Agency's (EPA) 2015 Multi-Sector General Permit for Stormwater Discharges Associated with Industrial Activity (MSGP). Based on the information provided in your Notice of Intent (NOI), storm water from the Idaho Materials and Construction Moyle Facility at 280 North Plummer Road in Star, Idaho (Facility) discharges into McHenry Lateral, which is part of the Boise River watershed. The State of Idaho Department of Environmental Quality established Total Daily Maximum Loads (TMDLs) for the Lower Boise River watershed for total phosphorus, sediment, and bacteria as Escherichia coli (E.coli), which includes McHenry Lateral. Table 9 of the Lower Boise TMDL lists this facility specifically as one to be assigned TMDL monitoring.

Specific Requirements

Pursuant to Parts 2.2.2.1 and 6.2.4.1 of the MSGP, the Facility is required to conduct storm water monitoring for total phosphorus, TSS, and E.coli following the standard benchmark monitoring procedures outlined in the MSGP at Part 6.2.1.

Table with 3 columns: Parameter, Benchmark Values, Source of Value. Rows include Total Phosphorus, TSS, and E.coli.

Basis for EPA to Add Additional Requirements

Part 2.2.2.1 of the MSGP, Existing Discharge to an Impaired Water with an EPA Approved or Established TMDL, states, "If you discharge to an impaired water with an EPA-approved or established TMDL, EPA will inform you whether any additional measures are necessary for your discharge to be consistent with the assumptions and requirements of the applicable TMDL and its wasteload allocation, or if coverage under an individual permit is necessary per Part 1.2.3." See also Part 6.2.5 of the MSGP (allowing EPA to notify a facility of additional monitoring requirements).

If you have any questions, please contact Margaret McCauley via email [mccauley.margaret@epa.gov](mailto:mccauley.margaret@epa.gov) or by telephone at (206) 553-1772.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Lidgard". The signature is fluid and cursive, with a large loop at the end.

Michael Lidgard, Manager  
NPDES Permits Unit
