Cc: Group Storet

The STORET Application v2.0

can be made to run the Oracle 11g and future clients by the following procedures:

* symbol highlights Oracle 11g files

Summary Procedures

Oracle Installation Order: Client/Server Configuration

1. STORET Report Module (STORET CD-Rom #1) - Reports&Forms 6i runtime engines
2. Oracle Client version matches Oracle Server 8i or above
3. STORET Data Entry Module (STORET CD-Rom #2) -Application v2.0 Client ONLY
4. Configure Oracle Client
 - TNSNAMES.ORA (ask Oracle Database Administrator)
 - STORET Application Logon

The STORET Data Entry Module was compiled to logon via the Oracle 8i Client (orasql8.dll)

However, there is a workaround to be able to use the STORET Data Entry Module with Oracle 9i or above Clients if you wish:

- 1) Drill down in the directory (probably C:\) where you installed Oracle 9i and go to the bin folder:
.....Oracle/Ora92/bin
- 1) Drill down in the directory (probably C:\) where you installed Oracle 10g and go to the bin folder:
.....Oracle/Ora10g/bin
- *1) Drill down in the directory (probably C:\) where you installed Oracle 11g and go to the bin folder:
.....Oracle/Ora11g/bin
- 2) Within the bin folder, locate the file: orasql9.DLL
- 2) Within the bin folder, locate the file: orasql10.DLL
- *2) Within the bin folder, locate the file: orasql11.DLL
- 3) COPY the file orasql9,DLL and save it in the same location (bin folder) as the "original file"
- 3) COPY the file orasql10,DLL and save it in the same location (bin folder) as the "original file"
- *3) COPY the file orasql11,DLL and save it in the same location (bin folder) as the "original file"
- 4) Rename the COPY of the "original file" to orasql8.DLL
- 5) Configure TNSNAMES.ORA
- 6) Done

Feel free to contact us if you have any questions.

Note: Standalone must install Oracle 8i Personal Edition (NOT Recommended)

Thanks.
STORET Group.

Subject: oracle client

Hello,

I am with the St Johns River Water Management District.

Wanted to find out if oracle client 11g is compatible with storet checker.

Thank you
