

2021 **Virtual** Regional, State, and Local Dispersion Modelers' Workshop

EPA MS Teams Online – June 21-23, 2021

2021 RSL DM Modelers' Workshop Logistics

- Monday was “Stakeholder Day” and was open to all.
 - After a year’s hiatus and a global pandemic, we averaged between **265-280** participants online yesterday!
 - This breaks all records across 40+ years of EPA hosting RSL Modelers’ Workshops.
 - Aside from MS Teams being a bit clunky at times, things ran about as smoothly as possible.
- Today and tomorrow are our more typical “Co-Regulators Days”
 - Only for federal, state, local, and tribal air agencies, and we welcome a few international co-regulators!
 - We will start today with a full compliment of State/Local agency presentations... assuring that the Workshop is just as much yours as ours.
 - There are a series of 3 Breakout Sessions this afternoon with 2 Breakout Options each. Links for each option will be listed through the main MS Teams link provide for today and copy/pasted into the Chat Box for ease on your end.

2021 RSL DM Modelers' Workshop Logistics

- MS Teams virtual meeting protocol rehash:
 - EPA's MS Teams seems to be up to the task based on yesterday's performance, but I just jinxed it.
 - Be patient when things lag... and feel free to drop off and rejoin if things freeze on your end.
 - Speakers are requested to turn on their cameras when not sharing their screen / presentation. Everyone else can leave them off to preserve bandwidth.
 - If you have called-in using the phone line provided, do not put us on hold... just hang up and call back.
 - Please keep yourself muted unless asking a question during the appropriate times... and the chat box works great for questions.
- Workshop website... agenda appears to be working today... presentations posted in a few weeks
