I am a dairy producer in Washington state. My husband and I have been dairy farmers for the past 35 years and it is a family business. We are very concern about our fellow family dairy farmers who are who were recently issued a EPA consent order. We are good stewards of our lands and follow all state and federal regulations. Why is EPA now adding a second contradictory set of standards on top of federal USDA guidelines, that have been in place for years. We are very concern about our future as a dairy farmer as well as our future generation.
