the dairy industry has worked closely with NRCS, Conservation, WSDA, GWMA and others in the last decade (plus) to improve application and monitoring on our farms. Dairy is way out in front of other AG groups as well as those buying fertilizers and such from the local stores, we care as much if not more than ANYONE about the future of AG in this state and country! many dairy's are generational and would like to continue providing top quality nutritional food for our family, friends and neighbors.

????

WHY WOULD EPA WANT TO

DAMAGE THIS WORKING RELATIONSHIP built OVER 10 YEARS ? Lets STOP the nonsense and get back to working on real solutions when and where real problems arise! I hope all comments will be listened to with careful consideration.

thanks for your time
