## Routine Facility Inspection (Quarterly)

This Routine Facility Inspection Report is written in accordance with section 3.1 of the Multi Sector General Permit (MSGP).

### 3.1 Routine Facility Inspection Procedures

Conduct routine facility inspection of all areas of the facility where industrial materials or activities are potentially exposed to storm water, and of all storm water control measures used to comply with the effluent limits of this permit. Due to the low risk of storm water contamination, routine facility inspections must be conducted at the Twin Falls facility quarterly (i.e., once each calendar quarter). Inspections must be performed when the facility is in operation. You must specify the relevant inspection schedules in your SWPPP document as required in Part 5.2.5.2. These routine inspections must be performed by qualified personnel with at least one member of your storm water pollution prevention team participating.

NOTE: Per the MSGP permit at least once a calendar year the routine facility inspection must be conducted during a period when a storm water discharge is occurring. If a discharge does not occur the Environmental Manager must notify EPA of such until a variance to the sampling requirement can be obtained.

### 3.1.2 Routine Facility Inspection Documentation

You must document the findings of each routine facility inspection performed and maintain this documentation onsite with your SWPPP. **You are not required to submit your routine facility inspection findings to EPA**, unless specifically requested to do so. At a minimum, your documentation of each routine facility inspection must include:

- The inspection date and time;
- The name(s) and signature(s) of the inspector(s);
- Weather information;
- All observations relating to the implementation of control measures at the facility, including:
  - A description of any discharges occurring at the time of the inspection;
  - Any previously unidentified discharges from and/or pollutants at the site;
  - Any evidence of, or the potential for, pollutants entering the drainage system;
  - Observations regarding the physical condition of and around all outfalls, including any flow dissipation devices, and evidence of pollutants in discharges and/or the receiving water;
  - Any control measures needing maintenance, repairs, or replacement;
- Any additional control measures needed to comply with the permit requirements;
- Any incidents of noncompliance; and
- A statement, signed and certified in accordance with Appendix B, Subsection 11.

Inspection Date: 6-6-19 Time of Inspection: 7:30 AM - 11:00 AM

Describe any discharges at the time of the inspection.

*NONE. There hasn't been a discharge from the plant for several years.*

Any previous unidentified discharges from and/or pollutants at the site?

No  Yes  If yes, describe:

Any evidence of, or the potential for, pollutants entering the drainage system?

No  Yes  If yes, describe:

*Identified several opportunities for improvement that are underway now and should be completed by next week (see attachments).*

State observations regarding the physical condition of and around all outfalls (1,3,5, and 8), catch basins and containment pond, and evidence of pollutants in discharges and/or Rock Creek:

*Sand bag rolls on West side of pond will need to be repositioned this summer. Catch Basins will need to be cleaned when they dry out. All outfalls are in great shape and clean. Zero evidence of pollutants in any outfalls.*

Any control measures needing maintenance, repairs, or replacement?

No  Yes  If yes, describe:

*Minor stuff. See attachments.*

Any additional control measures needed to comply with the permit requirements?

No  Yes  If yes, describe:

Any incidents of noncompliance observed or known?

No  Yes  If yes, describe:

**Subject:** SWPPP Inspection Action Items

Hi Chad,

As discussed during the Q2 SWPPP inspection yesterday I discovered a few opportunities.

Please have Josh address the following next week.

- #1) grab the two unopened bags of salt at Outfall #3 and the partial pallet in the metals recycling area behind maintenance and place in the starch warehouse.
- #2) Replace/clean/repair filter screens on intakes for UIC system servicing area outside of the forklift shop.

Thanks!

**Subject:** Action Items from SWPPP Inspection

Hi Tim,

Completed the Q2 SWPPP inspection yesterday and identified a few opportunities.

- 1) The tote outside by L2 Fryer used to capture roof runoff is almost overflowing. Could you please have it emptied?
- 2) On the railroad tracks near the tote mentioned above we have what looks to be dried potato skins that needs to be cleaned up. I think it could be easily scrapped into a pile and scooped into a trash can with a flat head shovel.

Other than that everything looked fantastic.

Thanks for your help Tim!

Hi Joe,

Completed the Q2 SWPPP inspection yesterday. Noticed two barrel containment pallets outside just West of the compressor room are 90% full.

Could you have someone on your team empty them in the near future?

Appreciated!
